

Toxicology - Pathology - Preclinical Services

The Company:

Pathology Experts LLC is a privately held Life Sciences consulting firm, founded by Dr. Maurice Cary backed by financial and operations support of CHIEFADVISORS LLC, consisting of senior level, expert, toxicologic pathologists who service the toxicology, histopathology and preclinical research needs of Life Sciences companies in Europe, North America and Asia.

Our Sponsors require the caliber of expertise offered by PELLC to support critical, time sensitive decision making concerning compounds in the preclinical and Phase I stages of development.

Services:

Pathology Experts LLC provides its customers with the highest level of expertise in toxicologic pathology. Our focus is on maintaining a team of highly experienced pathologists supported by the latest data capture software, globally standardized SOPs, globally standardized report formats, communication, stringent quality control requirements and customer support capabilities.

We focus and thrive on assignments where years of experience of our "Experts" in meeting deadlines, working under pressure and issuing high quality documentation are absolutely required.

Offerings:

- Peer Review
- Troubleshooting & problem solving
- GLP Certified Histopathology
- Preclinical development programs and study design
- Preparation of regulatory documentation (e.g. INDs)
- Report preparation: Toxicology and Pathology
- Placement and Monitoring of Studies at CROs
- Facility Inspection for Qualification (scientific & GLP)
- Product due diligence, M&A and licensing consulting
- Expert witness

Pathology Experts LLC can be an extension of your preclinical development group as a **Virtual Toxicologic Pathology Department**. This provides sponsors with access to world class resources, flexibility and a diverse array of subject matter experts. We welcome the opportunity to discuss a service plan that fits your specific requirements for toxicologic pathology.

Experts:

Pathology Experts LLC provides clients' access to highly qualified senior level pathologists who each have:

- A minimum of 15 years of translational research experience
- Board Certification or National Equivalent
- DVM and Advanced Degree(s) or National Equivalent
- Extensive pharmaceutical and biotech product experience

***When it is your most important compound, when it is time critical,
when it has to be right the first time, contact Pathology Experts LLC!***
